SHIP

HARDS

*Markets are shrinking?
Competition is killing you?
Margins are squeezing?
Got to cut costs to the bone?
Still, your clients expect more for less?*

*Sure, it's tough.
And it won't get any easier!*

*Yet, only when it's dark one can see the stars.
So you gotta be shining.*

SHIP

LEADERS

This is a story about **Viktor Lenac** - *the leading shiprepair, conversions and offshore shipyard in the Mediterranean* – our docks and cranes, our deeds and our people. Since 1896, we have been threading our way through the high seas, learning and growing with our clients and never giving up. We have become a byword for quality worldwide.

Our **culture** fosters **open communication** where different opinion is always welcome. We recognize hard work and **results**, take **responsibility** and make **decisions**, and treat each other with **respect** and **care**. This is what it takes to become and stay a **leader**.

SHIP

MASTERS

Processes, organization and technology are important and we continuously invest our time and resources to improve.

But it's our people that make the difference - their knowledge and passion are the key competitive advantage that we rely on and here we do not compromise.

Times change. Markets, dynamics, technologies, all is different, but reliability and quest for excellence are our constant, which is the key reason why our clients and partners keep doing business with us.

SHIP

INNOVATIONS

Throughout our journey, we have been sailing in uncharted waters of **ship conversion** and **offshore** construction.

We were **pioneers** in ship lengthening, conversions of tankers into car carriers, tankers into floating cranes, ROV into flexible pipe layer, ro-ro into fiber optic cable layer, barge to pipe layer, general cargo vessel into diving support vessel, floating crane barge into pipe producer/layer, train ferry to FPSO, and many more. We have built 16 offshore gas production platforms and an oil terminal jetty. Each of these projects required some **innovative** solution to be applied.

Innovation has become our **way of living** and **challenge** was always our **motivator**, never an enemy. We have tried, we have failed, we have **learned** and we have **mastered**.

SHIP

PARTNERS

No company can make it alone in a **networked economy** of today's **globalized** world.

Great **partner** can make you fly, bad partner may let you sink. So, we choose our **partnerships** wisely and nurture them diligently. We believe that **integrity**, mutual **trust** and **transparency** are the key ingredients for a **long-term partnership**.

SHIP

RELATIONS

Our vision is to be shipowners' **first choice** when looking for a top-quality **shipyard** and a reliable business partner in the **Mediterranean**. Our mission is to be there when **shipowners** need us, **delivering top quality, in a safe way, on time.**

Think this is just another sales pitch?

Come! Give us a chance to show you what we can do and you'll keep coming back to us, just as all our respectable clients do.

SHIPYARD

A large red ship, likely a tanker, is shown at night on the water. A tugboat is positioned in front of it, and a smaller boat is visible in the foreground. The scene is illuminated by the ship's lights and the tugboat's lights, reflecting on the water. The background shows a dark horizon with some distant lights.

*Come and let us make
your ships shine.*
